General

Health and Safety policy

ClampOn will maintain and develop a working environment that will be regarded as beneficial to the employee, the management, the owners and the customers.

ClampOn shall focus on human resources and relationships. One should seek to develop both human as well as technical skills within the company.

We will live up to this goal every working day within the company.

Environmental Policy

ClampOn's policy is to develop systems that are environmentally friendly, and not pollute surrounding environment.

We consider this during construction, development, procurement and production.

ClampOn shall follow the national and international laws regarding environmental issues.

ClampOn will also seek new markets to use of the measuring technology to reduce environmental pollution.

Information concerning health, safety and environment:

In connection with the materials ClampOn supply there are

- No chemical substances that may be hazardous to person or environment
- No noise pollution
- No vibration
- No radiation or radioactivity

Areas of responsibility

The compliance of the health, safety and environmental issues are responsibility of every employee. The personnel safety representative conducts HSE controls twice a year to detect any irregularities.
